On page 592 in the sentence, “Sweden provides a prime example: it has cut per capita emissions by two-thirds since the 1990s...”, “1990s” should be replaced by “1970s”. Reference is to Fig. 1, p. 107 of Pierrehumbert (2016): “since 1990 the reduction is about 35 %, while the economy has grown 60 %”.

In the Appendix text the seven figures are numbered according to the section in which they appear; thus, their numbers are Figs. A1, A3, A6, A8, A11, A12, and A13.

However, the figures themselves, collected at the end of the Appendix, are numbered consecutively as Figs. A1, A2, A3, A4, A5, A6, and A7.

Thus the translation of the figure numbers in the text is as follows:

A1	→	A1
A3	→	A2
A6	→	A3
A8	→	A4
A11	→	A5
A12	→	A6
A13	→	A7
