

Measure	Description
$\Delta\text{EF}/\Delta\theta$	Sensitivity of EF to soil moisture shifts between the experiments CTL and Clim20C (or CTL and ClimCTL)
$\Delta\text{TX}/\Delta\theta$	Sensitivity of TX to soil moisture shifts between the experiments CTL and Clim20C (or CTL and ClimCTL)
$\delta\text{EF}_\theta$	Absolute response of EF to the mean soil moisture shift between the two experiments considered
$\delta\text{TX}_\theta$	Absolute response of TX to the mean soil moisture shift between the two experiments considered
$\delta\text{TX}_{\theta_{Q1}}$	Absolute response of TX caused by the shift in the lowermost (first) percentile of the soil moisture distributions in the two experiments considered
$\Delta\text{TX}_x$	$\text{TX}_x$ difference between the two experiments considered
