

Interactive comment on “Jet stream wind power as a renewable energy resource: little power, big impacts” by L. M. Miller et al.

L. M. Miller et al.

lmiller@bgc-jena.mpg.de

Received and published: 25 August 2011

We thank J.C. Bergmann for his time and effort in preparing his comment.

In summary, all of Bergmann’s comments were:

- focused on a few small mistakes, admittedly the fault of the authors (*e.g.* zonal-meridional mix-up on p. 438, inverted y-axis in the original *v*-wind plot, Fig. 6b)
- illustrating a fundamental difference in the intention of modeling (*e.g.* full-complexity (Bergmann) vs. as simple as possible to answer the question (Miller, Gans, Kleidon))

A much more detailed response is available in the supplementary material.
