Received and published: 31 August 2012

Dear Referees, Dr. Oliver and Dr. de Noblet,

Hereby, I would like to thank each of you for your time, effort, and constructive feedback. The main reason why I wrote this paper is that I care about the world's remaining wilderness, and because I believe that the scientific community has not sufficiently mentioned global population growth as an important driver of wilderness decline. I wrote this paper in my personal capacity, i.e. the paper was not written for my employer and the views & conclusions described in the paper are solely mine.

Best regards,

Egon Dumont
