2.2 It's not clear if LULC maps have been acquired or derived from other geodata?

2.3.1 What's the reason for the aggregation of the 44 CORINE Classes to 9 classes?

Which GIS or Remote sensing software did you use to get the LULC information?

The use of KDE is quite popular at the moment in the GIScience, alternative analysis techniques to analyse settlement densities should be mentioned.

C432

Tables and figures should be included in the text.

Reconsider Figure 1. Different overlapping areas in the map are confusing. Revise the layout of the map! Color of the bounding boxes is different?
