Received and published: 28 November 2012

Dear Dr Pascolini-Campbell

your manuscript has been seen by two reviewers. Considering their comments, I regret to inform you that I do not encourage you to submit a revised version of your work. Although both reviewers find your contribution interesting, potentially helping at classifying ENSO events using a large variety of indexes, they also point at major flaws. Both reviewers mention misinterpretations of previous works and the question of the data detrending is a key one. In your final answer, you acknowledge both problems. I fully understand that you are willing to review your manuscript, but the required changes will make it an almost new manuscript, beyond a normal review process.

Best regards

Yves Godderis
