

***Interactive comment on “Radon monitoring as a possible indicator of tectonic events” by V. I. Outkin et al.***

**Anonymous Referee #1**

Received and published: 8 February 2013

I didn't understand the answer of Authors to point 1. I think some words are lacking.  
2) Radon in soil 10-16% is a big value. Authors mean concentration in volume? 3)  
Useful References should be included in text and discussed. Authors refusing them  
are outside scientific community.
