Received and published: 10 January 2016

There were a few misprints in my reply and in the Appendix E in the reply Supplement and the uploaded revised paper. In the line prior to Eq. (E4), T_0 should read T_{eq} , and the same in the line after Eq. (E4).

I have also decided to add some more discussion at the end of Appendix E about the implications of initial radiation flux imbalance, in particular in relation to volcanic forcing.

I upload as an addendum reply Supplement a corrected and extended Appendix E. This will replace Appendix E in the revised manuscript if this is accepted for publication in ESD.
