

Interactive comment on “A novel bias correction methodology for climate impact simulations” by S. Sippel et al.

H. Hoffmann

hhoffmann@uni-bonn.de

Received and published: 20 October 2015

Just going through the references:

Talking about 2d or multidimensional bias correction, the paper correctly cites the article "Two dimensional bias correction of temperature and precipitation copulas in climate models" of Piani and Haerter, September 2012. However, it should consequently cite as well the following article of Hoffmann and Rath, February 2012: Meteorologically consistent bias correction of climate time series for agricultural models. *Theor Appl Climatol* (2012) 110:129–141

Both articles deal with multidimensional bias correction and test 2d-examples. To my knowledge, these are the first two doing this.
