Dear Maxim,

many thanks for reviewing my article and for your important recommendations. I'll include more detailed information regarding color scheme and calibration into the text. I have one question regarding figure 8, which in my text presents a compilation of selected botanical assessments in the West- and the East-African Sahel since 1900. I suggest that you mean another figure, maybe fig. 17? If so, I do not understand your question completely, please could you give me more details?

Kind regards

C1

Hannelore
