

Dear Editor,

We have corrected the issues with the figures as indicated below.

“Dear Authors, I have received the reports from the reviewers. I am happy to say that they are satisfied with your revisions. I think this will be an important addition to the literature. I have 2 minor points:
1. The legend fonts of the Figures 9, 10, 11, 12 are too small to be legible. Also the text labels in fig 11 are overlapping. “

Fonts have been increased in all those figures and the text labels in fig 11 are not overlapping anymore.

“2. The SWin radiation bars in Figure 12 are impossible to see because their color is too similar to the alb+EF+SWin bar in the background.”

The color has been changed and is now more distinguishable from the background color.
