

Interactive comment on “Earth system data cubes unravel global multivariate dynamics” by Miguel D. Mahecha et al.

Anonymous Referee #1

Received and published: 12 November 2019

Dear thank you for giving me the opportunity to review this paper. The paper presents a new datacube approach, specifically designed to study Earth System science dynamics. The paper is well-structured, of high-quality and of interest for a wider Earth System Dynamics audience.

I accept the publication of this paper with minor revisions. Please find my comments for minor revision and a list of typing errors to be addressed attached.

Please also note the supplement to this comment:
