

Dear Yun Li,

We note that we found two typos in the Supplement and have fixed them for the final upload.

One was a missing bracket closure “)”

The other was the line below missing from the caption of Figure S6 and S8

“Amplitude is calculated as the November, December, January mean for the region 160E to 80W between 5N and 5S after the ensemble mean has been removed for each event in a single ensemble member taken as a running calculation along the time-series for 30-year periods.”

Kind regards,
Nicola Maher
